Clean Air

Clean air curriculum as a base  
for clean environment

# Oxford debate/Role play

# Proposed theses

The first thesis: In our village/town, there should be complete ban on burning coal and wood. More ecological alternatives should be introduced instead.

The second thesis: The fight against contaminated air is expensive. It will be better if the authorities buy residents anti-smog masks, air purifiers rather than fight the causes of air pollution.

The third thesis: Local factory is polluting air very much, it should be closed by the authorities.

# Reflection

- in pairs reflect on and discuss anything you remember from the lecture
